

Denby pottery is made with no additives, only clay, and is therefore dirty brown in colour. Coloured glazes are used to beautify their products and these colours are one of the main appeals of Denby products. The name Denby is highly regarded for its strong glazes which are craze free. Glazes are lead free and hand applied. Each piece of Denby pottery passes through 25 pairs of skilled hands prior to sale.

Denby have been producing quality stoneware in the village of Denby (the site of their raw material - clay), Derbyshire, England for nearly 200 years and has a worldwide reputation.

### **WHY CHOOSE DENBY?**

- Exceptionally durable and safe for use in oven, microwave, freezer or dishwasher
- New items introduced regularly
- Produced to the highest standards of English craftsmanship for nearly 200 years
- Logon to [www.denby.co.uk](http://www.denby.co.uk) and register pattern to receive pattern deletion information

### **LOOKING AFTER DENBY PRODUCTS**

#### **Dishwashers**

Denby recommends using low temperatures and liquid detergents in your dishwasher for all your Denby, including glass and cutlery

#### **Ovens, microwaves, freezers**

You can use your Denby for cooking in the oven and for storing food in the freezer. All pottery and china can crack if exposed to sudden changes in temperature, no matter how strong it is, so please don't take items from the freezer and put them straight into the oven or the microwave

#### **Stacking**

Take care in stacking and handling as scratches are more visible on coloured glazes

#### **Denby China**

China by Denby is safe to heat in an oven gradually to 100°C, but not above this temperature
