

Classic

Scanpan Classic is suitable for all cooktops (except induction) and is oven and dishwasher safe. Scanpan Classic is designed for use on low to medium heat settings.

Features:

Ceramic Titanium non-stick cooking surface with pressure-cast aluminium body. Scanpan Classic's titanium non-stick surface (not Teflon) is extremely durable with all kitchen utensils (even metal ones). The effective non-stick surface makes it possible to fry without fat.

Handles are fixed to the products by means of a patented system using no screws, rivets or springs. The handles can tolerate oven temperatures up to 270°C / 500°F. Glass lids can also tolerate the same oven temperatures.

Scanpan cookware is made of squeeze-cast aluminium, which ensures that the base will always remain level. The solid base and the ability of the aluminium to distribute heat evenly, contribute to reducing energy consumption whilst at the same time providing for stable cooking and frying properties.

10 year guarantee covering normal household use. Guaranteed not to blister, peel, crack or warp

The company:

Scanpan, founded in 1956, has been Denmark's leading producer of aluminium cookware for more than forty years

Through many year experience Scanpan have succeeded in combining modern technology with traditional craftsmanship. This has been implemented with the development of new products with an uncompromising quality and attention to detail.
