

Swiss Diamond®

DIAMOND REINFORCED NON-STICK COOKWARE

Diamond reinforced nonstick surface provides a lifetime of carefree cooking and effortless cleaning.

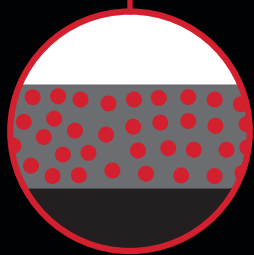

Extra thick, cast aluminum body provides perfect uniform heat distribution and will never warp.

- + Made in Switzerland
- + Cook with no oil
- + Eco-friendly production process
- + Oven-safe up to 500° F (260°)
- + Tempered glass lids with adjustable steam vent
- + Limited Lifetime Warranty

Rivet-free cooking surface for maximum protection against bacteria

Comfortable, ergonomic handles designed to stay cool on the stovetop. Oven safe to 260° C (500° F).

Real diamonds in a high quality nonstick composite.

Perfectly flat base will not tip or spin.

Suitable for:

Solid Plate

Radiant Ring

Ceramic

Halogen

Gas

Induction series also available

Swiss Diamond®

DIAMOND REINFORCED NON-STICK COOKWARE

Durable

Swiss Diamond cookware features a revolutionary nonstick formula reinforced with real diamond particles - the hardest material known to man - for a coating that will stand the test of time.

Energy Efficient

Nothing conducts heat more quickly or efficiently than diamonds. Combined with a cast aluminum body, Swiss Diamond maximizes heat transfer to eliminate hot spots. Because it transfers heat so efficiently, you never need to use more than medium-high heat, reducing energy consumption!

Healthy

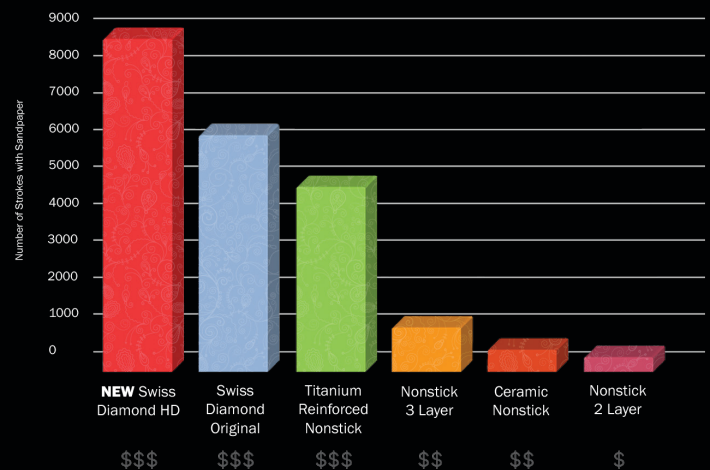

Designed for healthy convenience, Swiss Diamond allows cooking with no oil, helping you save pennies and lose pounds for a lifetime.

Some nonstick surfaces contain potentially harmful PFOA (Perfluorooctanoic Acid), but Swiss Diamond is PFOA-free through the entire production process.

Superior Nonstick Qualities

In lab tests, our diamond-reinforced coating proved conclusively that it significantly outperforms and outlasts the competition for years of nonstick cooking and easy clean-up.
